

Multi-head weigher line

PROJECT

Produce World Butterwick

DESCRIPTION :

- Arctica were commissioned to bring about process improvements to a broccoli and cauliflower packing line.
- A quality improvement in finished product was required, through a reduction in process damage.
- An audit of the multi-head weigher line was carried out and damage points identified.
- Arctica project managed the improvement modifications and recommissioning of the multi-head weigher.
- Ultimately, the shelf life was improved by 2 days.
- In addition, integration of direct feed to the line resulted in labour efficiency improvements.
