PROJECT

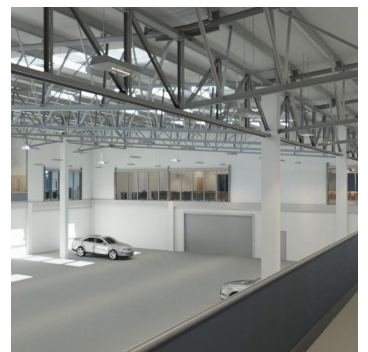

Ford College, Daventry

DESCRIPTION :

- Refurbishment of a redundant warehouse to create a new national training college to service the UK dealer network and for all new UK vehicle launches.
- Will provide workshop and dealership training facilities and a 200-seat tiered auditorium on the ground floor, and classroom training facilities on the first floor, together with a restaurant to serve 300 people.
- Provision of partial architectural consultancy services, including fire strategy and cost planning / tender documentation.
- Extremely light-weight structure required careful consideration of all works elements to limit loadings onto existing steel frame.
- Initial presentation to Ford Europe Board of Directors necessitated photo-realistic images to show main areas of the building.
- Run as a collaborative BIM project in the early stages using Revit.
