## PROJECT

# Sauce & paste ingredient manufacturer

### DESCRIPTION :

- New scraped surface process vessel to enable an increase in production capacity.
- Layout optimised for limited area available, and designed to allow a future extension to accommodate a further vessel with minimal modification.
- Pigging system to minimise product loss during transfer to downstream operations.
- Provision of tender documentation including specifications, drawings and Process & Instrumentation Diagrams (P&ID's), tender adjudication and general engineering support.
- Installed in a live factory with minimal disruption to production.

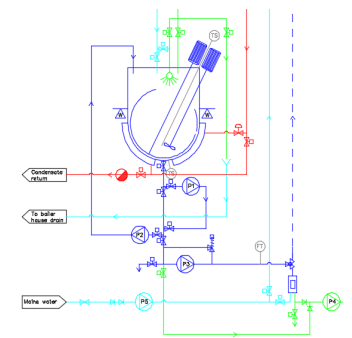

Cooking vessel

Hygienic stainless steel detailing

Integration of services

Extract from initial P&ID
