

Ship construction hall

## PROJECT

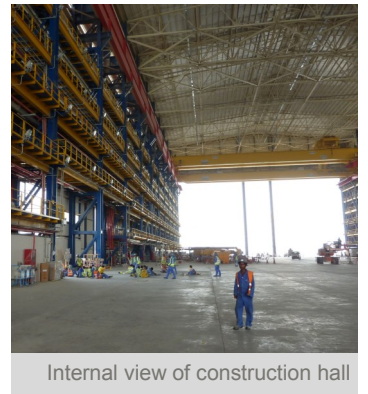

# Ras Laffan, Qatar

## DESCRIPTION :

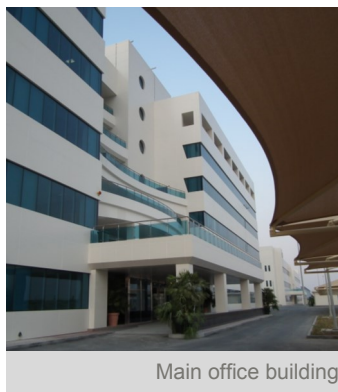

- Part of the Ras Laffan Refinery, this new \$5bn development provides repair and maintenance facilities for very large tankers and the construction of smaller vessels and super yachts up to 175m long.
- Arctica provided architectural consultancy services for the design and construction drawings of 12 major buildings with a total floor area of 275,000m<sup>2</sup> or 3 million sq. feet.
- The buildings comprise offices and amenity facilities for up to 6000 people, crew quarters, specialist workshops, fabrication sheds, and new ship /super yacht construction facilities.
- 43-hectare site, 7km into the Arabian Gulf on reclaimed land. Opened in 2010.
- Construction hall is 270m x 95m x 45m high; canteens to seat 3,200 people, one with 1,200 seats; offices for 1,500 staff.
